

SENSOR LIGHT

COMPATABILITY

This sensor light is compatible with all Asgard sheds, it's magnetic strip simply attaches to the shed. DO NOT remove adhesive strip. No tools are required to fit this light.

CHARGING

When finding the LED light dimmed, please charge it using the USB cable provided. The blue light indicates it's charging, while a red light indicates it is fully charged. The device takes 4-6 hours to charge, **do not charge for more than 6 hours.**

CONTROLS

The USB and power/mode switch is located on the end of the light with the PIR sensor.

MODE INSTRUCTIONS

Always on Mode - Hold down the power button to start this mode. The always on mode simply leaves the light on and will not switch off if no movement is detected.

Motion Only Mode - When the LED Sensor Light has been turned on, simply tap the power button to make indicator flash red. In the dark shed, the Sensor Light will automatically turn on if it detects motion within 3 metres. This automatically shuts off after 20 seconds of no movement.

Motion & Light Sensor Mode - When the LED Sensor Light has been turned on, simply tap the power button to make the indicator flash green. The light automatically turns on if it detects motion or senses another light source when the door opens within 3 metres and automatically shuts off after 20 seconds of no movement.
